

One student with an idea. To us, she's one in a million.

The Synopsys Silicon Valley Science & Technology Outreach Foundation reaches a remarkable milestone this fall: we've now provided support to 1,000,000 students and teachers developing science projects. It comes in the form of materials that help students execute and display their work, workshops that help teachers inspire their students, and science fairs, like sciencepalooza! and The Synopsys Championship, that reward our students' hard work and creativity.

Science projects prepare students for life.

Funding for the Synopsys Outreach Foundation is made possible by a generous grant from

SYNOPSYS
